

**Turnkey Production Facilities Secured Inside a Shipping Container - Ready to Deploy Now!**

# EXTRACTION LABS

## Turnkey Cannabis Extraction Labs:

We build fully equipped cannabis extraction and processing units with interlocked electrical and emergency systems. These include all explosion proof controls, gas detection systems, and ventilation for both dilution and extraction fan systems.

We have professionally engineered our containers for Co2, Butane, Hexane, Isopropyl Alcohol, and mixed solvents. Our extraction pods offer a safe and controlled environment for effective cannabis extraction and processing.

Our container systems have been approved by the Washington State Liquor Control Board, and several local fire departments in multiple states including California, Nevada, Colorado and Oregon. All our buildings including our C1D1 and C1D2 Extraction Laboratories have been professionally engineered and have undergone a 3rd party engineering review.

# MODULAR GROW PODS

## Linked Equipment Grow Pods:

We can supply you with a ready-to-go Grow Pod fully equipped with Lights, De-Humidifiers, HVAC, CO2, Electric, Plumbing, and much, much more to get you growing in a fraction of the time from a conventional build out.

These turnkey containers eliminate the headache of missing crucial deadlines and going over budget due to months of construction. Our plug and play containers will allow you to start generating revenue immediately.

Our totally sealed, self-contained buildings are fully automated and come with state-of-the-art controls to precisely manage and keep the container at its optimal condition for your cultivation needs. By controlling all the atmospheric variables associated with cannabis cultivation, we can replicate the environment identically from container to container regardless of the strain or specimen inside.

# KITCHEN CONTAINERS

## Commercial Kitchen Containers

Our Kitchen Containers are intended to be used on or off the grid and can be customized for your specific business needs. Our modern, building code compliant kitchens are an alternative to traditional building methods.

Our modular solutions are particularly suited to sites that have no kitchen facilities or are looking to upgrade or extend the footprint of current facilities.

Our Commercial Grade Kitchens are the perfect environment to try out your new recipes. Whether you are extracting for tinctures, making edibles or cooking up new kinds of butter, these kitchens have all the right ingredients to make sure your products pass inspection – both by regulators and consumers. The Linked Equipment team is well versed in developing kitchen containers that meet or exceed commercial kitchen safety standards. These units provide easy to clean stainless steel surfaces inside a durable, fully secured, portable building.

# SECURE VAULTS

## Secure Storage Vaults

Linked Equipment is becoming a specialist in the new and exciting sector of secure vaults. When building a marijuana facility, secure vaults are increasingly becoming a topic of discussion. Our secure vaults can be used for a variety of purposes, such as currency storage, equipment storage, product security and more.

Our vaults are totally secure with sturdy steel walls & ceilings, and a thick, locking steel door. When these features are combined with the weight inside, our vaults become nearly impossible to move or break into.

We offer security systems inside the vaults, so you can monitor all your valuables. Security and peace of mind within the facility is very important, we at Linked Equipment can make all of this happen.

# RESTROOMS AND SHOWERS

## Portable Restroom & Shower Units

Linked Equipment can offer you portable, toilet, shower, and bath buildings in a variety of shapes and sizes.

All rooms can be partitioned to your preferred format while being fully set up with all plumbing ready to connect to the external plumbing source or as an off-grid unit with pumps and containers for black and brown water.

We can build these for Male, Female, and Unisex options. Our units are fitted to meet ADA Accessibility regulations.

Campground owners/operators, farm and ranch operators, and special event coordinators are but a few of our recent customers who have utilized this effective turnkey restroom solution.

# OFFICE FACILITIES

## Modular Office Spaces

We understand that running a special event or a small business requires attention to both cost and functionality.

Our containers can be retrofitted to accommodate practically any office size necessary, from small booths for administration to larger office suites that cover the needs of your expanding business.

We can construct interconnected office spaces, offering more functionality with connecting rooms, private spaces and bathroom facilities. Our office container units can be fully insulated and outfitted with air conditioning, beautiful floors and painted walls.

**3454 E Illini Street, Phoenix AZ 85040**

### **Core Benefits of Linked Equipment Containers:**

- ✓ A Cost Effective, Turnkey Extraction Lab Solution
- ✓ Completely Mobile & Portable By Design
